06 / INVESTMENT PERSPECTIVE

Look beyond the headline rent

Gross yield and operating cash flow answer different questions. Both are useful - neither guarantees an investment return.

EXAMPLE: A CASH-PURCHASED BUY-TO-LET

A fictional £150,000 rental investment let at £1,000 per month. Costs are assumptions for illustration, not a property appraisal or tax calculation.

PURCHASE & OPERATING ASSUMPTIONS

Property purchase price	**£150,000**
Assumed buying costs (illustrative)	**£12,000**
Total capital invested (cash buyer)	**£162,000**
Potential rent: 12 months × £1,000	**£12,000**
Illustrative annual operating surplus*	**£7,550**

GROSS RENTAL YIELD

8.0%

£12,000 ÷ £150,000

ILLUSTRATIVE NET YIELD*

4.7%

£7,550 ÷ £162,000

WHAT ELSE AFFECTS YOUR RETURN?

- Void periods and unpaid rent
- Major repairs and unforeseen costs
- Borrowing and mortgage interest
- Tax, legal duties and property values

*Cash flow uses page 6 costs, including management fees with VAT and assuming no VAT recovery. It excludes mortgages, taxes, major works and other expenses. Buying costs and returns vary. Seek qualified advice before investing.
